

FOR IMMEDIATE RELEASE

CUSTOM COMPUTER SPECIALISTS ACQUIRES UNICOM TECHNOLOGY GROUP

ACQUISITION LINKS TWO LEADING REGIONAL INFORMATION TECHNOLOGY SERVICE PROVIDERS

HAUPPAUGE, NY (July 21, 2008) — Custom Computer Specialists Inc. (Custom) announced today that it has acquired UNICOM Technology Group, Inc. (UNICOM), a Woonsocket, Rhode Island-based expert consulting organization that provides technology solutions to corporate, education, government, and healthcare clients throughout New England.

The acquisition will enable both organizations to broaden their service offerings, increase market and technology specific investments, adopt respective best practices, and expand geographic coverage.

Highlights include:

- Creation of a Northeast regional services firm dedicated to helping clients align their technology environment with their business objectives
- Focused solutions for K-12 institutions including market leading E-Rate expertise and the provision of Infinite Campus™ Student Data Management System licensing, implementation, and support services
- Healthcare market expertise to support provider, plan management, and life science organizations
- Enhanced disaster recovery, business continuity, and regulatory compliance solutions
- A full portfolio of IT service offerings including application development, infrastructure, and support services
- The ability to handle large scale deployment and support projects across the Northeast
- A seasoned team of over 200 highly trained engineers, technicians, and developers holding multiple advanced certifications

“We are extremely pleased to welcome UNICOM into our family,” said John McSweeney, Custom’s President. “Together, our organizations will be able to offer a far greater depth of resources and an expanded set of capabilities. Our similarities in corporate culture, solution approach, and business philosophy will enable us to maintain our creativity, flexibility, and client-centric personal service. We are expecting immediate and demonstrable benefits for our clients, partners, and personnel. This is going to be fun!”

In New England, the organization will continue to operate as UNICOM. All client teams remain in place and will be supported with the know-how, best practices, and expanded capabilities of the combined firm. On August 1, 2008 UNICOM will relocate offices to Blackstone Valley Place in Lincoln, RI and re-affirm its long standing commitment to Rhode Island. The combined firm expects to grow throughout New England and the Northeast, creating high wage, “knowledge work” positions.

Michael Davis, President and CEO, UNICOM added, "We have known and collaborated with Custom for over 20 years. Our combined strengths allow us to create enormous value on behalf of our clients and deeply support their technology investments. We are ready to grow and I am very excited to be part of such a great team!" Mr. Davis will join Custom as Executive Vice President, responsible for New England operations.

The acquisition closed on July 14th, 2008. All UNICOM team members will join Custom to create a combined organization with 295 employees.
