We all have a common goal; ensuring that our students graduate with the skills they need to thrive in tomorrow’s economy. Achieving that goal requires the creation of a technology investment plan to ensure you select and adopt relevant technologies that are in line with your district’s budget and available funding.

Despite the source of the funding - district budget, grant monies, NYS Smart School Bonds Act or the federally funded E-Rate program, true success is really only achievable when you create plans that ensure you are making the best choices for your students.

Maximize Your Funding with a Technology Investment Plan

We’ll help you create a Technology Investment Plan that:

- Demonstrates that you have an adequate infrastructure in place
- Aligns to your instructional technology plans
- Contains a near-term plan to physically maintain investments
- Showcases your capacity to support any recurring costs
- Meets funding source requirements

Maximizing Available Funding

We’ll help you identify and maximize available funds to support your technology based initiatives, including:

- Making sense of the NYS Smart Schools Bond investment lifecycle
- Understanding the changes to the E-Rate program
- Working with your district and your E-Rate consultant to ensure a successful E-Rate filing

Technology Investment Lifecycle Services

Once you’ve secured funding, you can be assured that Custom will be there for you with our Technology Investment Lifecycle Services, which is comprised of a full range of services to support you with the implementation, adoption, support and maintenance your new technologies.
