BEYOND IT DUE DILIGENCE

Understanding the True Technology Cost of an Acquisition

KNOW THE RISKS. UNDERSTAND THE INVESTMENT. PLAN WHAT COMES NEXT.

A due diligence report can tell you what is wrong. CCS helps you understand what it may cost to make it right.

Aging infrastructure, cybersecurity vulnerabilities, licensing gaps and technical debt can create unexpected post-close expenses. Identifying those issues is essential—but buyers also need remediation priorities, investment visibility and an executable integration plan.

FROM FINDINGS TO FINANCIAL CLARITY

TRADITIONAL DUE DILIGENCE	CCS IT ACQUISITION NAVIGATOR
Identifies technology risks	**Prioritizes risks and corrective actions**
Documents infrastructure gaps	**Evaluates modernization requirements**
Highlights cybersecurity exposures	**Connects findings to remediation planning**
Reports technical debt	**Helps estimate post-close IT investments**
Delivers an assessment	**Can support remediation and integration**

WHY IT MATTERS TO ACQUIRERS

- **PROTECT VALUE**
  Surface technology liabilities before they become surprises.
- **IMPROVE VISIBILITY**
  Inform deal planning with potential remediation investments.
- **ACCELERATE INTEGRATION**
  Prioritize stabilization, security and post-close execution.
- **SUPPORT GROWTH**
  Build scalable environments for future acquisitions.

ONE PARTNER, FROM DILIGENCE THROUGH INTEGRATION

ASSESS > STABILIZE > INTEGRATE > OPTIMIZE & SCALE

CCS combines IT due diligence with cybersecurity, infrastructure, cloud and managed services expertise—helping buyers move from assessment to practical execution.

MAKE TECHNOLOGY A MORE PREDICTABLE PART OF YOUR NEXT DEAL.
